Who are we?

R-Go Tools develops ergonomic tools for healthy screen work and delivers worldwide through partners. Our products are characterized by the unique combination of ergonomics, affordability, durability and design.

We care for your health

Healthy living and healthy working are important for everyone. Therefore we design ergonomic products with you in mind!

[Read more on pages 20 and 21](#)

We care for our environment

We believe we have a responsibility to be good stewards of the earth we live on. We put this into practice by:

- Using recycled raw materials
- Producing circular monitor arms
- Working together with One Tree Planted
- Striving for a low CO₂ footprint
- Our affiliation with WEEE, an organization that takes care of the recycling of electronics

[Read more from page 30](#)

We care for people in need

We support worldwide development projects through our foundation Tools4Life. To give people in need, a second chance, we create jobs by cooperating with:

- Agua Viva Foundation
- In-Made (p. 28-29)

[Read more from page 40](#)

Because we care.

Stay fit during your workday!

Short breaks are the secret to increased productivity, focus and job satisfaction.

A stiff neck or back is often a signal to get moving. If you take a break and take time to do something else, you recharge. Your muscles relax, your circulation gets back going and you become refreshed.

Healthy working with R-Go Break Software

The R-Go Break is a software tool that helps you remember to interrupt your work with breaks. As you work, the R-Go Break software controls the LED light on your Break mouse and/or keyboard. This light changes color, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you get feedback on your break behavior in a positive way.

The R-Go Break can be personalized. You can increase the break frequency in case of complaints or on the advice of your therapist. Personalize your breaks by setting a reminder when it's time for a cup of tea, a game of table tennis or a walk.

The R-Go Break software analyzes your working behavior and displays it in a graph. This graph shows how intensively you use the mouse and keyboard. Because, measuring is knowing.

R-Go Break Software

R-GO BREAK

Scan the QR code to watch the R-Go Break video!

BREAK INDICATION LED

Alerts you with color signals on your R-Go Break mouse and keyboard when it's time for a break.

ADDITIONAL MODULES

The Sit/Stand Coach moves your desk from sitting to standing height. The Fit Coach offers you various stretching exercises (45 days free).

PERSONAL

The software measures your actual use of mouse and keyboard and gives break advice based on this. The break times and frequency can be adjusted personally.

Download the free software and open a world of possibilities.

R-Go Break is conveniently built into your mouse, keyboard or numpad. Expand the software with our additional Sit/Stand Coach and Fit Coach modules to work even more fit! Download the R-Go Break software and try out all modules free for 45 days.

www.r-go-break.com

Review

'The Anti-RSI software is fantastic! You can't manage what you can't measure and this software measures your mouse use and keeps track of recommended breaks and break times... all the time. The indicator light is clear enough and you will find that you will occasionally see the orange and even the red light, and hopefully less and less of the red light.'

"The Anti-RSI software is fantastic!"

Get fitter with the extra Break modules

Sit/stand coach

- ✔ Adjusts your desk from sitting to standing height
- ✔ Compatible with Linak, Innotech and OMT
- ✔ Based on actual screen use
- ✔ Personalized settings
- ✔ With free Pause Coach

Fit Coach

- ✔ Offers via pop-up screen exercises for during your break
- ✔ Personalize your exercises
- ✔ More than 80 exercises
- ✔ With free Break Coach

Sit/stand Coach

Helps you alternate sitting with standing regularly!

This personal coach uses software to control your electric desk, so you stay productive and fit all day long stay fit throughout the day.

By changing your posture regularly throughout the workday, you stimulate blood circulation and prevent physical complaints. On the basis of actual screen use the Sit/Stand Coach steers your desk from sitting to standing or a height in between (for use of a stool or desk bike). The sit/stand coach is developed in cooperation with furniture manufacturers.

SMART DESK

Compatible with systems of Linak, Innotech and OMT.

PERSONALLY ADJUSTABLE

Always work at your good working height(s), set your personal settings for sitting and standing.

Fit Coach

Stretch along with the Fit Coach!

With the Fit Coach software you stay fit during your working day! The Fit Coach offers you various stretching exercises through a pop-up on your screen during micro-breaks. You can personalise the Fit Coach by selecting the type of exercises. You can choose from the following exercises:

- Balance
- Neck and shoulders
- Legs
- Posture/relaxation

During the exercises you will be coached with the help of a video, pictures and a simple description.

**DEVELOPED BY
PHYSIOTHERAPISTS**

The Fit Coach contains more than 80 exercises developed by physiotherapists.

PERSONALISE

Decide which muscles you want to stretch and the number of exercises you want to do per break.

R-Go Break products

Discover all products that work seamlessly with the R-Go Break software!

R-Go HE Break mouse

- ✓ With break indicator light
- ✓ Natural ergonomic shape
- ✓ Different sizes, left and right
- ✓ Customizable buttons
- ✓ Adjustable DPI

R-Go Split Break keyboard

- ✓ 2 parts for maximum freedom
- ✓ Change in 1 movement to compact
- ✓ With break indicator light
- ✓ Ultrathin for better blood circulation
- ✓ Easy to take with you
- ✓ 2 connections for R-Go Numpad Break
- ✓ Multiple layouts available
- ✓ Light keystroke for minimal muscle strain

R-Go Compact Break keyboard

- ✔ Compact model
- ✔ With break indicator light
- ✔ Ultrathin for better blood circulation
- ✔ Easy to take with you
- ✔ 2 connections for R-Go Numpad Break
- ✔ Multiple layouts available
- ✔ Light keystroke for minimal muscle strain

R-Go Numpad Break numeric keyboard

- ✔ With break indicator light
- ✔ Ultrathin for better blood circulation
- ✔ Easy to take with you
- ✔ Light keystrokes for minimal muscle strain

Ergonomic mice

VERTICAL MOUSE

The natural position of hand and wrist stimulates mouse movements from your arm. This prevents RSI complaints.

Want to know what size fits your hand? Turn to page 53 to find out!

FITS EVERY HAND

Our mice are available for left- and right-handers and in different sizes. A mouse for every hand!

BREAK INDICATION LED

The mouse warns you with color signals when it's time to take a break.

ERGONOMIC SHAPE

Round shape with support for the little finger and thumb for a comfortable grip with less muscle strain.

60°

R-Go HE Break Mouse

The patented R-Go Break mouse indicates with color signals when it's time to take a break. As you mouse, the light changes color, just like a traffic light:

- Green: well done!
- Orange: Time for a short break
- Red: You've been working too long

This way you get positive feedback about your break behavior.

Our mice are made of **recycled plastic**

Ergonomic keyboards

COMPACT MODEL

The compact size ensures that even with right-handed mouse use, both hands are always within shoulder width.

BREAK INDICATION LED

The keyboard alerts you with color signals when it's time for a break.

ULTIMATE FREEDOM

With the built-in magnet you can turn the R-Go Split Break into a compact keyboard with one move.

R-Go Split Break: ultimate freedom

Experience maximum freedom of movement while typing with our R-Go Split Break keyboard. This keyboard has all the ergonomic features you need for healthy typing. The R-Go Split Break consists of two separate parts that you can place on the desk in any desired arrangement. This splitting prevents a bend in the wrists while typing. Typing with straight wrists lowers muscle tension and prevents pinching of tendons and blood vessels.

R-Go Break keyboards

The patented R-Go Break keyboards indicate with color signals when it is time to pause. As you type, the light changes color, just like a traffic light:

- Green: well done!
- Orange: Time for a short break
- Red: You have been working too long

In this way, you receive positive feedback about your pausing behavior.

Our keyboards are made of **recycled plastic**

Because we care.

Healthy living and healthy working is important for everyone. That's why we design ergonomic products with you in mind! With our ergonomic expertise we design affordable ergonomic solutions that help you to work healthy. Whether you work at home, in the office or on the road, we always have a solution that fits you.

**Read our
blogs! Scan
the QR code.**

Ergonomic design

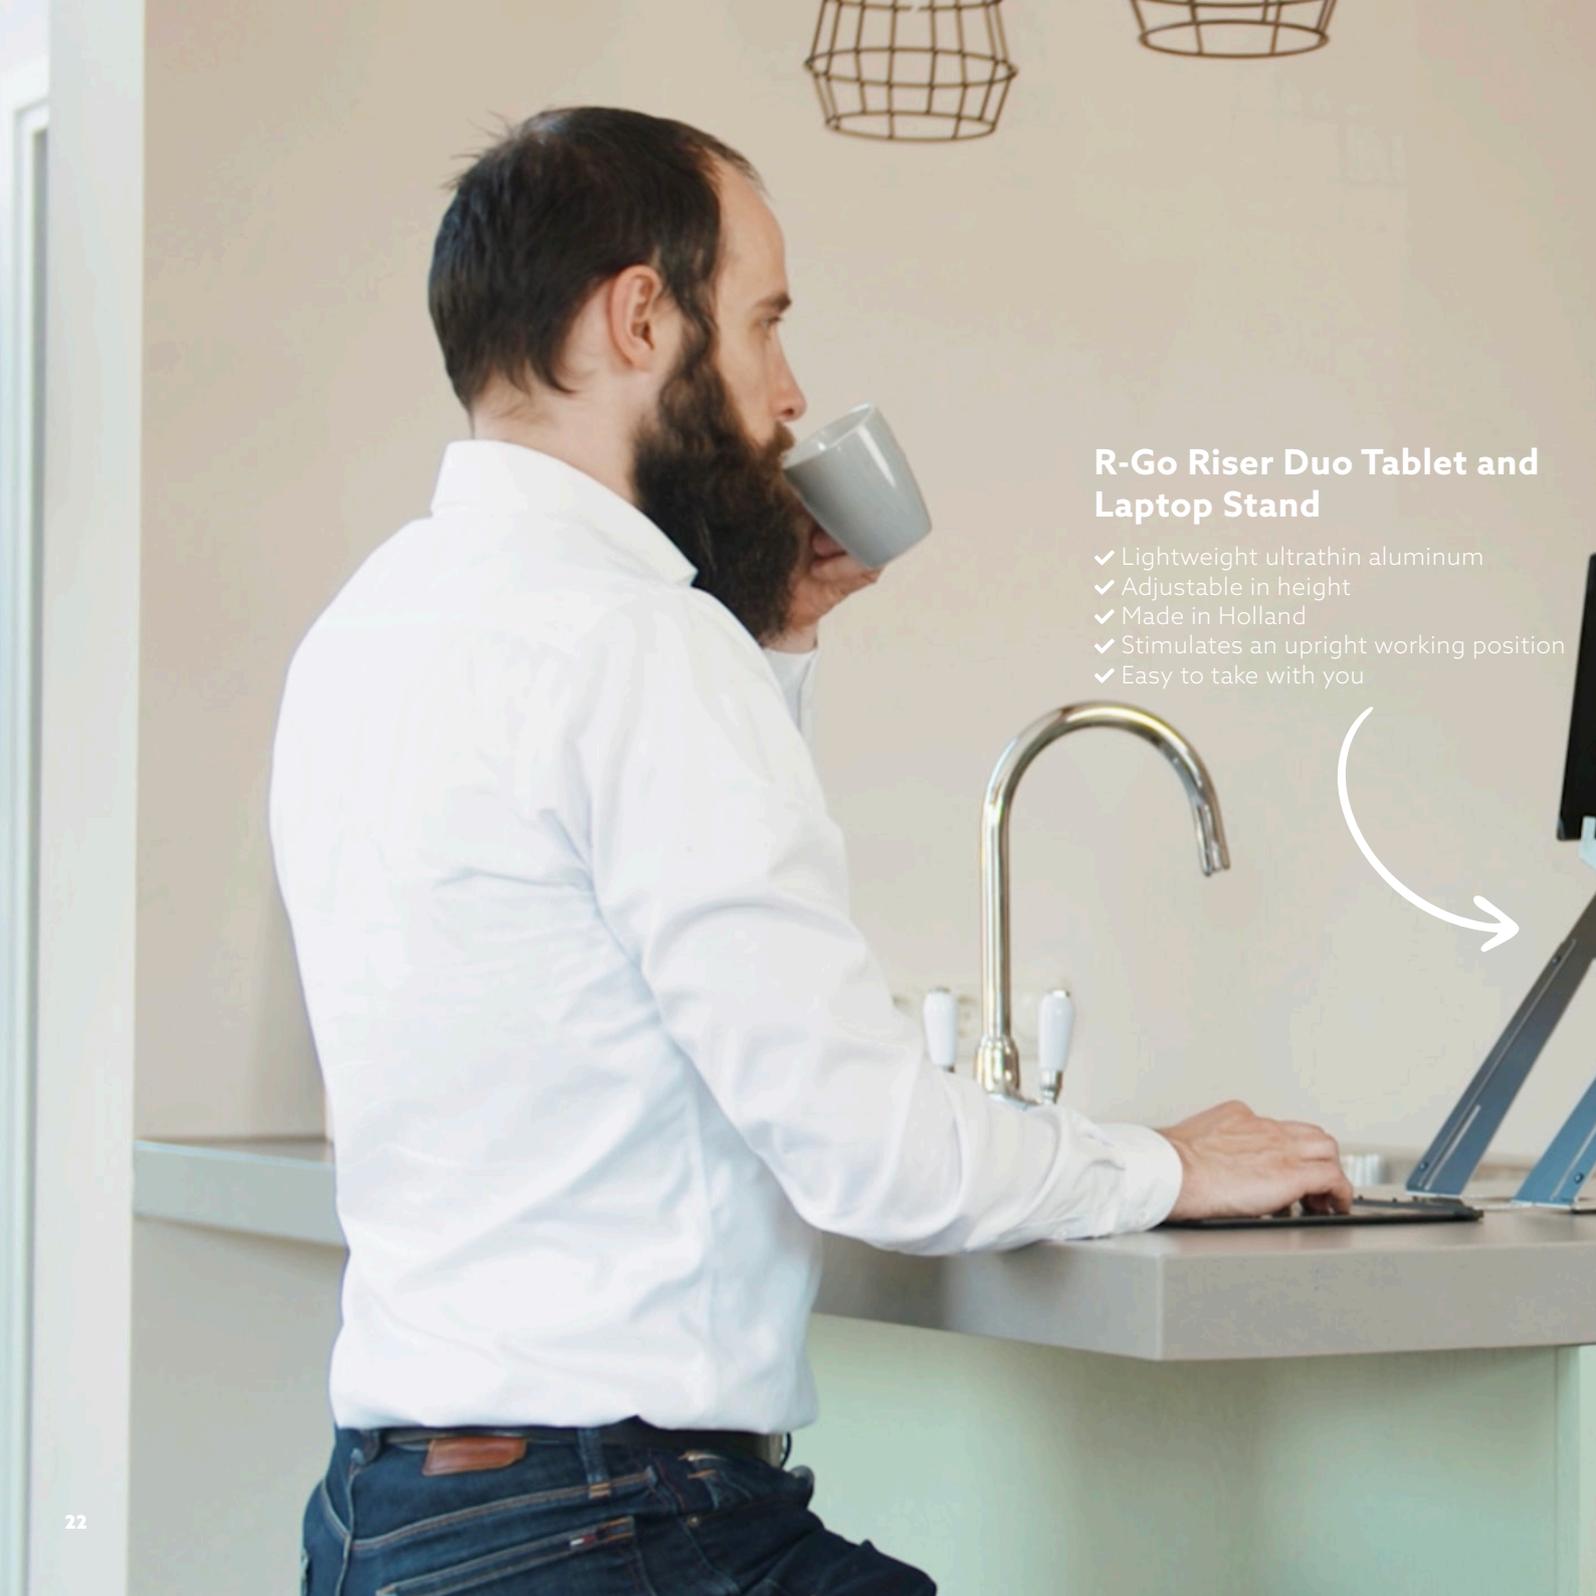

In the design of our products we take anthropometry, ergonomic principles and the applicable (Health and Safety) guidelines into account.

We strive for ergonomic solutions that are suitable for everyone, regardless of your height, posture and whether you are right- or lefthanded. Because screen work can quickly lead to strain on small muscles and tendons in the wrists and hands, we design the keyboards and mice in such a way that minimal muscle tension is required to operate them. In the test phase we therefore also use muscle tension meters. Our new products are evaluated by external ergonomists and a test panel of users.

Ergo Experts

We like to share our knowledge with you. We have written several whitepapers to share our ergonomic knowledge with you, such as: "How to work healthy with a monitor?", "What is the best ergonomic mouse?" or "Is working standing the solution?". In addition, we regularly write blogs to address the latest developments in the field of healthy working.

R-Go Riser Duo Tablet and Laptop Stand

- ✓ Lightweight ultrathin aluminum
- ✓ Adjustable in height
- ✓ Made in Holland
- ✓ Stimulates an upright working position
- ✓ Easy to take with you

Healthy working with a tablet? It is possible!

With a tablet, you can work anywhere. In the train or on the couch, you can easily check that one document. Flexible working brings a lot of variety and exercise. You would think that this is good news! But there is also a downside: prolonged tablet use can overload your body. Here you can read how this occurs and what you can do about it!

Small screen, big risk

When working with a tablet, the head is bent far forward. The lower the position of the screen, the greater the strain on the neck. This can quickly lead to neck problems.

Often the tablet is held with one hand in a strong pinch grip, while the other hand touches the screen. This puts the wrist and hand in an unnatural position. A tablet may not weigh much, but still the muscle tension in your arm and hand can quickly become too high. With prolonged use, this causes pain.

The readability of the screen also has an influence. Tablets often have a glossy screen with high resolution. The effect: many reflections and small characters. In the long term, this can cause eye complaints and loss of performance. Did you know that you read slower from a screen than from paper anyway?

Watch your tablet behavior

With these 6 tips you can work healthily with your tablet!

- 1** Maintain an upright posture, keeping your head straight above your body.
- 2** Don't hold the tablet in your hand or on your lap.
- 3** Raise the screen and tilt it at least 45° during use.
- 4** Do not use a tablet for more than 30 minutes at a time. So take short breaks regularly.
- 5** When using a tablet for less than 2 hours a day, use a tablet riser, an external keyboard and possibly a mouse.
- 6** When using a tablet for more than 2 hours per day, always use a separate monitor and separate input devices.

R-Go Treepod Bio-based Laptop and Tablet Stand

- ✓ 2-in-1 stand
- ✓ 100% biobased material
- ✓ Modular design
- ✓ Made in Holland
- ✓ Adjustable height

Ergonomic tools

There are handy tools that allow you to raise your tablet. At your fixed office workplace you can choose a monitor arm with a tablet holder. The advantage of this is that the tablet screen can be placed at eye level. This stimulates an upright working posture.

A solution for every screen

Would you like to know more about working with a tablet, a laptop or a desktop at a fixed workstation? **Download** our white paper and read all about ergonomic solutions for any screen.

R-Go Riser Duo

The R-Go Riser Duo laptop and tablet stand can be used to raise both your laptop and your tablet. The stand is easily adjustable in height in 4 positions, so you can always work at eye level. This puts your head in a natural position and reduces tension in your neck and shoulder muscles. The R-Go Riser Duo is ultra thin and lightweight: ideal to take with you in your bag!

Laptop stands

STAND-ALONE LAPTOP STAND

ULTRATHIN

Lightweight, only 1.4 mm thin, easy to carry. Perfect for travelling!

MADE OF ALUMINUM

This laptop stand is made of aluminum, which makes it very strong: it can carry up to 5 kg!

EASILY ADJUSTABLE

Can be adjusted into 5 positions. Brings the screen easily to eye level and prevents neck and shoulder pain.

AVAILABLE IN BLACK, WHITE AND SILVER

Do you often work in a bent posture?

Your neck muscles have to constantly tilted position have to constantly lift your head, which is very demanding on your neck. This bent posture is very common when using a laptop. Research has shown that laptop use can entail a greater health risk than the use of a fixed of a stationary PC. For example, the laptop not be properly adjusted to the user: the keyboard is fixed to the screen and mouse control is unfavorable. With more than 2 hours of laptop use per day, the chance of complaints increases significantly.

We have the solution!

In order to work healthily with your laptop, chromebook or tablet, we have developed ergonomic laptop stands. These raisers bring your screen easily to eye level. This way your head is in a natural position reduces the tension in your neck and shoulder muscles.

Do not forget to use a separate keyboard and mouse.

In-Made

The place where 8,000 detainees work on their future

Watch the In-Made information film

In-Made, the first step to paid work

Over 8,000 inmates work for In-Made during their incarceration. In 22 penitentiaries in the Netherlands, the prisoners are given the opportunity to learn employee skills in a real production environment, with modern machines and tools under expert supervision. The goal being: a better chance of reintegration and paid work.

R-Go Steel & In-Made

The work of In-Made matches our vision to offer employment to people who need a second chance. That is why we started working together. Since November 2021, the inmates have started producing and assembling R-Go Steel laptop stands. By purchasing the R-Go Steel products you support the great work of In-Made.

We care for people in need!

Read more about how we make this vision a reality starting on p. 40.

All Steel Laptop stands

R-Go Steel Travel

- ✓ Foldable: easy to take with you
- ✓ Made in collaboration with In-Made

R-Go Zepher & R-Go Caparo Monitor arms

- ✓ Certified 100% circular
- ✓ Modular design
- ✓ Fully adjustable
- ✓ With patented SMART functions
- ✓ Dutch design
- ✓ Integrated cable management

Make an impact with low CO₂ footprint monitor arms

Did you know that the last 8 years were the warmest years ever? The main contributor to this contributor to this climate change is the greenhouse gas CO₂. Circular technologies play a key role emissions, circular solutions play a role.

Our monitor arms are designed according the principles of "circular product design" with the goal of a low carbon footprint.

Because we care.

We feel responsible to be good stewards of the earth we live on. This means that we think carefully about how our products should be made and what materials we use.

Sustainability starts with design

Our monitor arms are designed according to the principles of circularity.

Modular design

Modules can be easily replaced, repaired or upgraded

Minimal weight

We use a minimum of materials so the weight is also minimal

Designed to last

Made from premium materials for long life

Certified 100% circular

The monitor arms are made from recyclable materials. They are designed so that the materials can be easily separated for recycling. The packaging is collapsible and 100% cardboard

Lifetime recycling warranty

There is a lifetime recycling guarantee on all monitor arms, whereby the material is 100% recycled.

Plant trees!

Did you know that a tree absorbs an average of 22 kg (48lbs) of CO₂ per year? We compensate every kilogram of CO₂ needed for the production of our monitor arms by planting trees. The basic principle here is that the CO₂ emissions of a monitor arm must be compensated within 5 years. As trees have an average life of 40 years, in this way we compensate more than necessary.

To compensate the CO₂ emissions of our monitor arms, we work together with the non-profit organization One Tree Planted which is dedicated to reforesting our planet. After choosing the best tree species, they work with

local communities to plant the trees. Planting is usually done during the rainy season when the soil is wet, providing optimal conditions for the trees to survive.

Did you know that in addition to absorbing CO₂ trees also:

- filter the water we drink
- provide habitats for more than 80% of biological diversity
- provide employment for more than 1.6 billion people
- are the main constituents of 25% of all medicines?

Scan the QR code and watch the video

Monitor arms

INTEGRATED CABLE MANAGEMENT

Route all cables neatly with the integrated cable channel

INTEGRATED GAS SPRING

The Caparo 4 monitor arm has an integrated gas spring

INSTALLATION FROM ABOVE

The monitor arms can be easily installed from above the worktop

FULLY ADJUSTABLE

Easily adjustable in depth with one hand. The screen can also be tilted and rotated as desired. The Caparo can also be adjusted in height with one hand due to the gas spring.

MODULAR DESIGN

Easy to expand as desired with a document holder, laptop holder, Smartbar or an extra arm.

WITH SMART FUNCTIONS

Our monitor arms are designed in the Netherlands and use patented Smart technologies, such as a rotation stop for each moving part.

Healthy monitor work

Did you know that an incorrect set-up of the monitor has a direct effect on your work posture? A hunched over posture can quickly lead to neck and shoulder complaints. In this position the weight of your head causes the force on the neck muscles which is comparable to 27 kilograms! With the use of a monitor arm you can raise your monitor to eye level easily and quickly. This way you automatically adopt an upright working position.

Tailor-made monitor arm

Our monitor arms are modular in design, allowing you to create an ergonomic workplace in any situation. Do you work with multiple screens or do you prefer to use a document holder or laptop arm? It's all possible with the help of separate modules.

Tips for working from home!

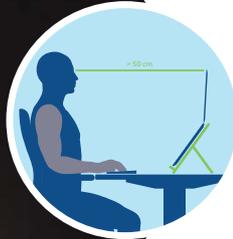

Do you also regularly work from home? Especially then it is important to pay attention to your workplace. Because with a healthy home office you can work comfortably and efficiently and you prevent unpleasant neck, shoulder and wrist complaints. To be able to work everywhere in a healthy and ergonomic way with your laptop or chromebook, we have put together a number of tips.

1

Sit comfortably in the back of the chair with your back against the backrest and let your forearms support you while your shoulders droop.

2

Place the screen directly in front of your body and put the top of the screen at eye level. For your laptop, use a laptop riser and place documents on a document holder.

3

Place the keyboard and mouse close to your body and also place your phone within reach.

4

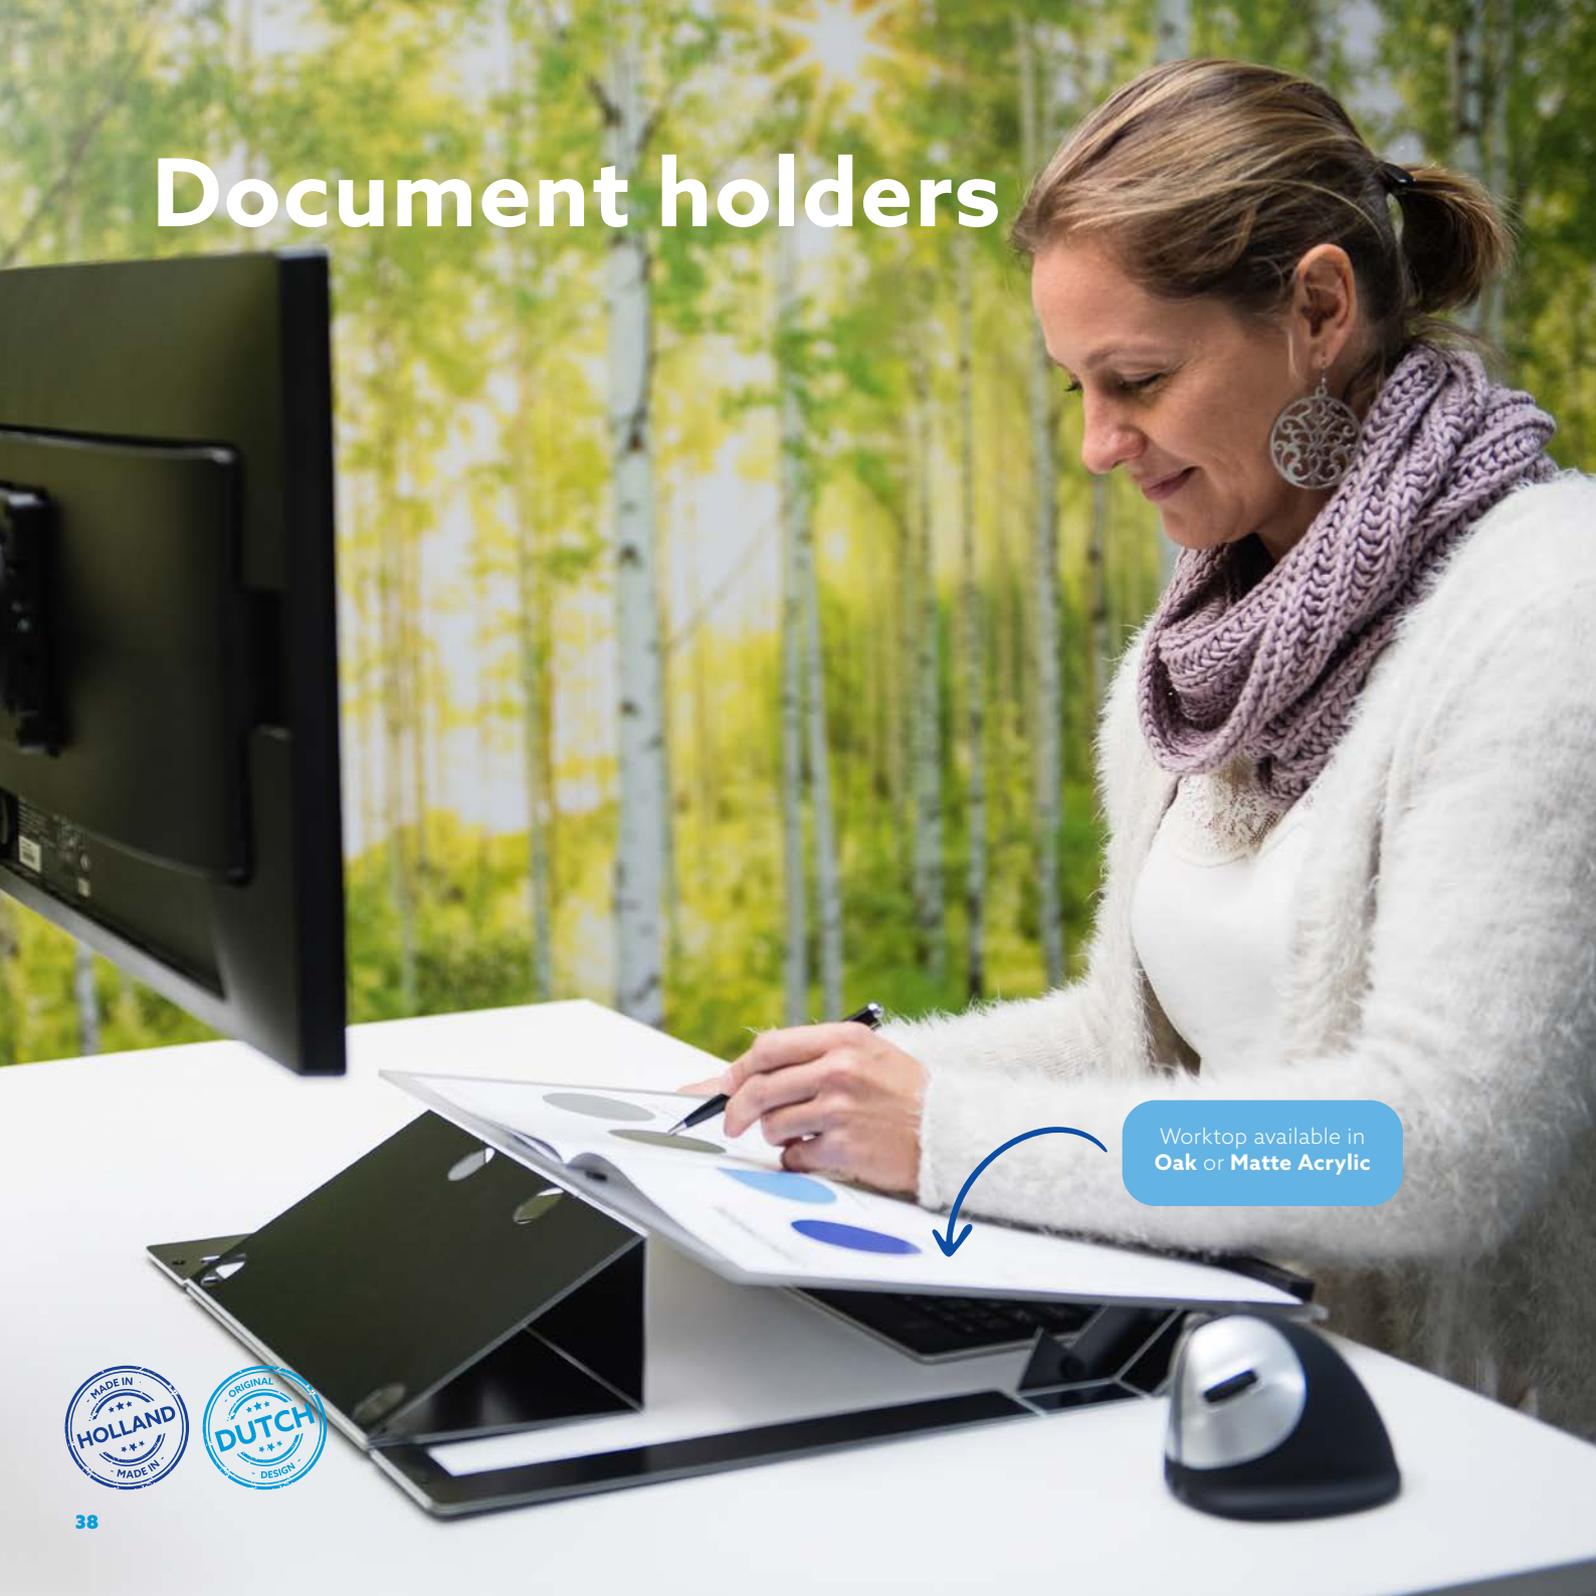

Typing is healthier than mousing, so use quick keys as much as possible. Move the mouse from the whole arm rather than from the wrist. Use a separate keyboard and mouse if you work from your laptop.

5

Limit the number of hours of screen work and take short (micro) breaks regularly. The advice is to get out of your posture after every 10 minutes and relax/stretch your muscles. Alternate sitting regularly with standing and walking. This will keep you fit and focused!

Document holders

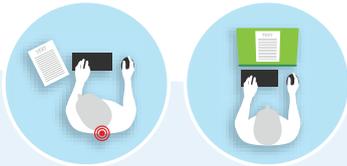

Worktop available in
Oak or Matte Acrylic

Read2Write in one motion.

With the R-Go Read2Write you are unconsciously stimulated to work in a healthy posture. This document holder is easily transformed into a lectern by pulling the top over your keyboard. By bringing the work towards you, you prevent a hunched posture. By placing your documents in front of you rather than next to your keyboard, you avoid unnecessary turning.

For taking notes, the Read2Write has a soft foam wrist support on the front. This prevents annoying pressure on the wrists while writing. Besides ergonomic features, this document holder and lectern in one also has a unique design. It is made of lightweight aluminum with a thin top made of oak or matte acrylic.

R-Go Read2Write as document holder

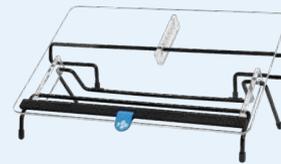

R-Go Read2Write as lectern

All document holders

R-Go Read2Write

- ✔ From reading to writing in one move
- ✔ Unique design with ultra-thin aluminum base

- ✔ Unique design with black steel base

Because we care.

Because we care.

We support various development projects worldwide through our foundation Tools4Life. We currently donate a large part of our profits to projects in Brazil, Hong Kong and Indonesia. Our mission is to develop and produce products in cooperation with these projects, like our R-Go Viva Laptop Bag. This way we not only provide financial support, but also employment opportunities for people who need a second chance.

Projects we work with:

- Agua Viva Foundation
- In-Made (read p. 28-29)

About the Agua Viva Foundation

People can get into trouble and get stuck due to circumstances. This can be due to drug or alcohol abuse, debt, illness, divorce or psychological problems.

Agua Viva is a Christian organization with the mission to work for the Brazilian people under the motto "people become Human again". The foundation offers these people a new chance. Learning a trade is an important part of this to be able to provide in their livelihood.

become
Human again”

Laptop Bags

Watch the video!

Healthy working is possible everywhere!

Laptops are ideal for taking everywhere. Unfortunately, they are not designed for healthy working and provoke a hunched posture. And it's just this position that is so taxing for the neck and shoulders. We have developed the R-Go Viva laptop bag, which makes it possible to work in a healthy way everywhere. With the integrated laptop stand in the bag you create a healthy workplace at any location.

The bag is equipped with a height adjustable stand, so that the screen can easily be put at eye level. You will automatically sit in an upright position. The bag is also equipped with extra pockets for a separate keyboard and mouse.

"Everywhere a mobile ergonomic workplace: quality leather laptop bag which is socially responsible produced."

Edwin v.d. P., ISS

Now available in two colors

R-Go Viva Laptop Bag

- ✓ Available in black and brown
- ✓ Made in Brazil
- ✓ Certified sustainable leather
- ✓ Adjustable height
- ✓ Adjustable shoulder strap
- ✓ Extra storage compartments

R-Go Viva Laptop bag

Certified Durable Leather

For our R-Go Viva laptop bag we found a leather producer that tans leather in an environmentally friendly way and is regularly audited and certified with "Gold" by the LWG (the highest standard for leather tanning). The choice was made to use "full grain" leather, which ensures a natural appearance. With this leather, the entire hide is not separated into an upper "top grain" and "split" layer. Thus, the surface of the leather is not sanded or polished to remove imperfections or natural marks from the hide.

"GOLD RATED" LEATHER

For our laptop bag we have chosen leather with the highest certification of the international organization LWG "Leather Working Group".

Join us

The R-Go Viva laptop bag is produced in cooperation with the Agua Viva foundation in Brazil. By buying our laptop bag you ensure that people in need are given the prospect of a new life. By offering them employment, you not only give them perspective, but also a source of income. In addition, approximately 20% of the production costs of the laptop bag are donated to the Agua Viva foundation. This way they can give even more people a new chance!

SOCIAL PROJECT

Our laptop bag is produced in collaboration with the Agua Viva foundation in Brazil.
